Electric Milk Frother

Information

Model : F280T/Lookyami280

Voltage : 220V-50Hz

Power : 550W

N.W. : 850g

Capacity : 100-250ml

Size : 166*120*190mm

Heating Element : Plate Heating

Wire length : 0.75m

Magnetic Rotation, Rapidly Foaming

The base is equipped with a DC motor. When the motor rotates, the magnetic force structure of the head of the motor drives the magnetic component with magnetic force in the cup to rotate and produce delicate milk foam quickly.

One key to control multifuction

Room temperature milk foam

Hot Milk Foam

Hot Milk

Hot Chocolate

The cup mouth design is convenient to control the flow rate of the milk, and it is more convenient and simple to make latte art.

Milk Pitcher Design Cup

The mouth of the milk cup refers to the design of milk pitcher. It is convenient to pour milk foam directly for latte art.

One key to repair

When there is a stuck bean situation, the mixing head will stop rotating and restart automatically after the self-repair is completed.

The base of the main unit and the milk cup adopt a completely separable design. All electronic components and heating devices are designed on the base. The milk cup can be directly placed in the water for clear washing, which can solve the cleaning problem safely and quickly.

Base and Cup adopted separately design.

304 Stainless Steel

- Good Rust Prevention
- Difficult Deformation
- Convenient Cleaning
- Easy Maintenance

Humanized accessories storage

The bottom of the machine is equipped with a stirring head, and magnet adsorption storage space to prevent the loss of the stirring head.

Double protection Anti-electric shock

The machine is equipped with dual power control contacts at the bottom, the machine will automatically power off when the mixing cup is raised or not placed flat.
