Part one

## Basic Parameters

## Product parameters

**Model:** DZ25-1A

**Product name:** Little Giant 5L Milk Steamer

**Color:** White

**Voltage:** 220V/50~60Hz

**Power:** 3000W

**Boiler:** 5L

**Heating range:** 50-99°C

**Screen size:** 7inch

**Boiler material:** Stainless steel

**Product size:** 220\*299\*433.5mm (L\*W\*H)

# 02

Part Two

## Features

Quality Forged by Craftsmanship  
Innovation Seeks Perfection

6 Hole Steam Nozzle Design  
5 Groups of Temperature  
Can Be Set

3000W High Power

5L Stainless Steel Boiler

Multiple security protection

Anti-suction Function

7-inch Touch Screen

Magnetic Water Filter  
Tray Design

Insect Proof  
Mesh Design

## 5 Groups of Temperature Can Be Set

### Intelligent Multi-segment Program Setting

- Easy one Press, Flexible to meet a variety of beverage making needs
- Intimate self cleaning program design
- Efficiently release condensate, pipeline is as clean as new

# 6 Hole Silent Steam Nozzle Design

---

6 hole silent nozzle design

More outstanding heating efficiency

Realize product standardization

## 5L Stainless Steel Boiler Configuration Extended Runtime with Enhanced Power

---

5L Stainless Steel Boiler  
Steamful, Extended Runtime with  
Enhanced Power

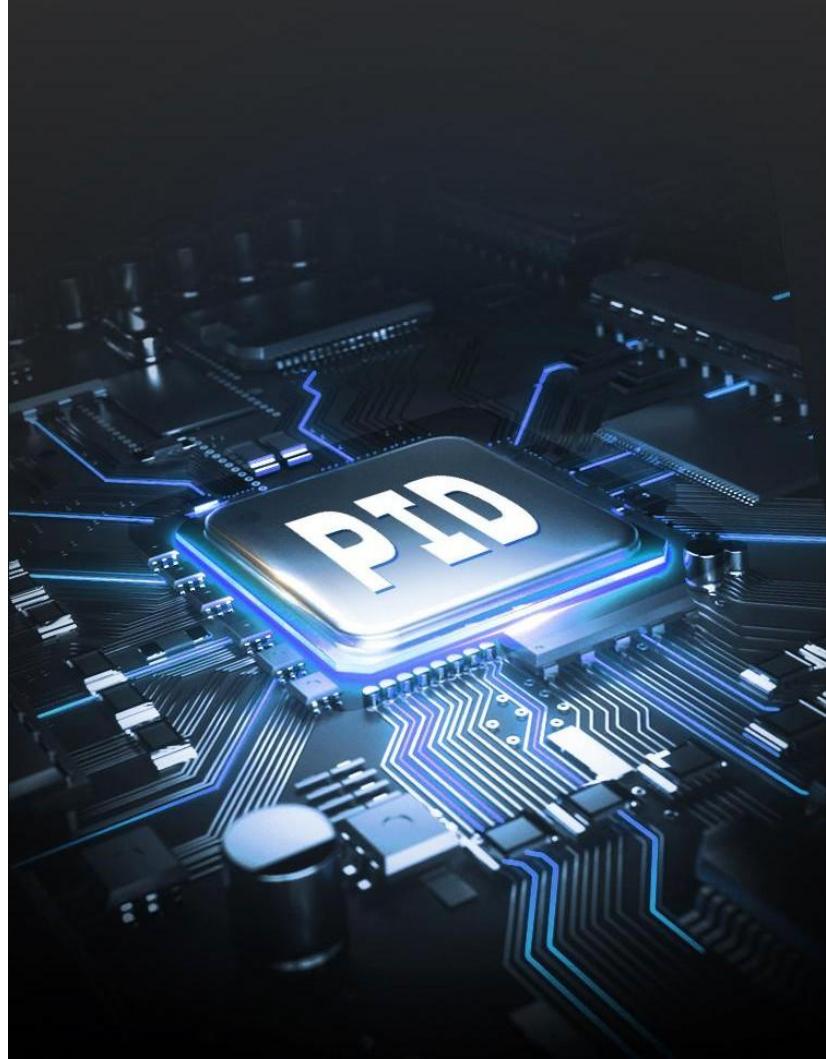

# PID temperature control system configuration

---

PID temperature control system configuration

Ensure precise and stable temperature control

Ensure consistent quality of stores

# Low Noise Operation

## Guard the Tranquil Atmosphere of The Store

---

Equipped with 6 hole silent steam nozzle

Run more quietly

Heated to 65°C, the measured noise average is only about **80** dB.

Multiple protection, thoughtful design

Operate more Relieve worries

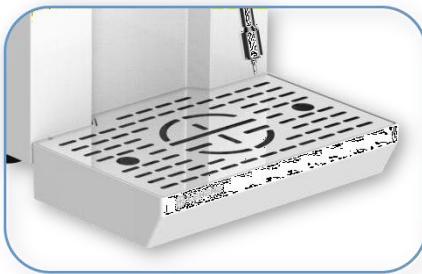

---

- ✓ Water and power shortage protection
- ✓ Anti-suction function
- ✓ Automatic pressure relief valve

# Detailed Protection      Thoughtful Design

---

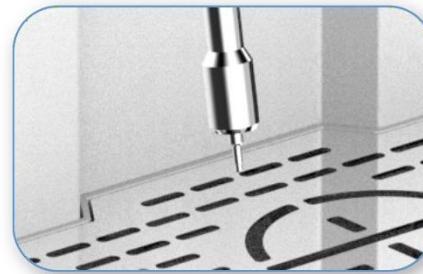

## Magnetic Water Filter Tray

Dispose of wastewater cleaning is more convenient

## Anti-suction Structure Configuration

Prevent liquid back suction when the valve is closed, causing pipeline contamination

## Built-in Probe Design

Precise monitoring of real-time dynamic temperature to maintain consistency in product output
